

KIKANI VIDHYA MANDIR

(Founded by Shree Coimbatore Gujarati Samaj)

(CBSE School)

PROSPECTUS

"Give us your child, take back a Leader"

SCHOOL PROFILE

Kikani Vidhya Mandir envisions a world in which every child becomes a healthy and productive next generation leader with high ideals and humanity. We lay emphasis and focus on the fundamentals and essentials for a successful life blended with leadership qualities. Right to freedom of speech and expression is one of the quality exercised by students to a large extent, every student will learn to respect himself, thereby utilizing all the opportunities available during the years to emerge as self reliant, self confident individual. The curriculum is well designed to map the holistic development of every child bearing in mind the co - existence of individual differences and different learning styles. We believe in the truth and fact that "Every Child is Capable Of". To maximize individual capabilities the curriculum provides opportunities in all spheres of learning. It is imperative to empower young minds to realize their identity in this world and to articulate their hopes, aspirations and desires.

The Excellent faculty provides the best ambience, conducive for learning.

The teaching faculty facilitates a welcoming learning environment. However it is at the choice of the individual learner, to utilize and mobilize the learning resources. The parental guidance and support to a greater degree becomes mandatory for a student to succeed. We aim to provide quality education in an ideal environment, combining both homely warmth and strict discipline in the school community. Kikani Vidhya Mandir focuses in individual capability and in improving fundamental skills to create Next Generation Leaders with high ideals and humanity through,

"HAPPY SCHOOLING AND JOYFUL LEARNING"

VISION

To transform students
into outstanding Global Citizens.

MISSION

For us, education is not just academic excellence....
It's about character building combined
with emotional and spiritual growth,
thereby creating outstanding global leaders.

CORRESPONDENT'S MESSAGE

Warm greetings dear parents!

At the outset my hearty welcome to all the prospective kids on board on our ship “**Kikani Vidhya Mandir CBSE**” on a never ending and a forward moving voyage of self-discovery and self-realisation.

Education is defined as a means to empower children with knowledge and to convert the same into wisdom- a bridge of misery into hope of a good future. Education has been a subject of heated debates and discussions. Hundreds of articles have been written and dissected on how the education system needs to evolve and thrive.

Our policy at **Kikani Vidhya Mandir** firmly believes that education needs to be student centric and meet the needs and aspirations of the children. We strongly feel that a child is born with creativity and curiosity. The school takes special efforts to nurture the above at a very early age and which in turn gets innovative as the years progress.

Kikani Vidhya Mandir focuses primarily of the five most important dimensions of education namely;

- Informative
- Sciences
- Art of Living
- Arts & Creativity
- Art of health and meditation.

This we feel, is the holistic approach to education. Our school lays emphasis on building strong bonds of relationships between the teacher and the students. A bond of care and compassion, that shapes the mindset of children so that the entire learning ecosystem thrives and makes progress.

Our innovative approach to education makes learning a joyful and stress-free experience. We live by our motto to transform your children into leaders of tomorrow, having strong foundation of ethics, values, humility and spirituality.

On behalf of the entire **Kikani Vidhya Mandir**, we invite your children on this journey of learning and self-discovery.

Thanks and Regards

INFRASTRUCTURE

Schools should create an environment that not only assures learning, but also pays special attention to the mental and physical well-being of the students. Studies and researches conducted to figure out the effect of infrastructure suggest that students in schools with poor infrastructure can have lower achievement scores as compared to the ones studying in schools that have better infrastructure and facilities. From a clean campus, well-equipped labs, extracurricular workshops, libraries, halls, games equipment, assembly area to proper sanitation facilities the essentials for a happy schooling is what we offer to our students.

THE CAMPUS

Located at the heart of the city, our school campus is spread across 2.52 acres with a playground alone of an area of 7365 Sq.Mtrs. From the classrooms, the cellar to the bustling labs and physical training spaces, our campus is a hive of learning, activity, and engagement — permeating with creative energy and friendly interaction among students, faculty, and staff.

THE AUDITORIUM

Sarojini Natraj Auditorium - The aesthetically designed indoor hall with a seating capacity of 1100 people is an added feature of the school to host various celebrations, assemblies for students, value based lectures, satsangs and music concerts throughout the year. This space is open for public too during the weekends.

LIBRARY

The serene ambience inspires a love for reading. Interaction with eminent authors, book reviews and reading sessions are conducted regularly exposing, students to good written and reading skills. The library houses over 6000 books and it is a treasure trove of information.

SMART ROOMS FOR SMART KINDERGARTEN

To make the teaching-learning process more interesting, interactive and productive; teachers use an Interactive white Board which has multiple functions. The Smart Board Technology allows us to save each and every transaction and ultimately the final notes can be easily given to the students. Teachers not only use power point presentation and a flash technology but can directly use the software for enhancing the concept clarity.

LABS

Effective teaching and learning of science and maths involves a perpetual state of show and tell. We combine classroom teaching with laboratory experiments to ensure that their students grasp each and every concept thoroughly. The Physics, Chemistry, Biology and Math labs at KVM are well equipped and suitably designed for students which help them to enhance their scientific and logical skills.

TRANSPORTATION

To ensure safe travel, the school has its own fleet of outsourced school buses designed as per standards and manned by trained drivers and personnel sensitized to the needs of small children. The Transport Service (optional) is operated by the school and a separate transport fee is charged for this

ERP and PA

We at KIKANI have an effective ERP system where information that the school / parent want to communicate are done instantly. For communication within the campus, we have a public address system which enables swift and clear communication to students inside the classroom

SAFETY MEASURES

Fire extinguishers are installed in all corners of the school building to ensure safety of the school and the students. We have CCTV coverage for the school which keeps a record of minute to minute happenings in the different wings of the school premises. We have a 24/7 Security system whereby guards are always present at all the entrances.

LOCKERS

With safety and security being two key assurances all schools should give to their students, we at Kikani have not compromised in providing the same. The students are provided lockers to store their belongings. Far from simply being a 'nice-to-have', school lockers offer a great deal to students, teachers and parents beyond serving as a secure place for students to keep their things over the course of the school day. We believe it helps the students learn essential life lessons like trust, respect and independence.

KIKANI'S TODDLER HOUSE

- Exclusively designed 'Integrated Inter-disciplinary Thematic Curriculum' - The curriculum is designed to help children become involved learners, think critically and be creative. It meets the requirements of tapping multiple intelligence. This curriculum nurtures learning through play and activity-based learning.
- Braindemics – A story-based curriculum where children learn concepts on a monthly basis. In addition to the concept, various activities are done on a daily basis which aids in the retention of the concepts learnt.
- Theme-based colourful classrooms that uplift the mood of the children.
- Interactive boards and materials that aid the learning.
- Experiential learning materials in concurrence to the daily concepts.
- Exclusive play area to develop their psychomotor skills and physical growth.
- Fully equipped library to inculcate the habit of reading.
- Physical training hours specially designed to aid the physical growth and achieve the developmental milestones of a child.
- A 360-degree assessment pattern and a card that records the progress of the child.
- Child-friendly toilets.

SCHOLASTIC OFFERINGS

VALUE EDUCATION

Nature to Nurture an organization that believes our brain is a precious gift which can always be nurtured and trained to bring out our genius. They provide value-based education which aims at training the student to face the outer world with the right attitude and values. It is a process of overall personality development of a student. It includes character, personality, citizenship, and spiritual development. With the support of 2 excellent educators in this field, we at Kikani truly believe this programme is one of the most effective ways to achieve our mission in creating a leader out of every child.

ICT – STEAM EDUCATION

In today's world - creation of new information, discoveries, inventions are taking place at a fast pace. To keep pace with these developments & advancements, our school curriculum will have to evolve, and the 21st-century learning methodology can act as a crucial bridge to this gap.

Understanding this need, Kikani has collaborated with Mind Box, a system that enables the learning of 21st Century Skills – Creative Thinking, Critical Thinking, Collaboration, and Communication.

These 21st-century skills will allow students to function, learn and adapt throughout their life and go way beyond the common and traditional academic structure. Through this Project and Design based learning approach, we create an environment for your child to learn and develop these 21st Century Skills where classrooms are student-centric, and teachers act as facilitators of learning.

PHYSICAL HEALTH TRAINING

Physical education positively influences a student's personality, character and self-esteem. In addition, the team-building process enhances communication skills, and the skills required to get along and cooperate

with students of varying ethnic backgrounds and personalities. It is also essential to the development of motor skills and the enhancement of reflexes. Hand-eye coordination is improved, as well as good body movements, which helps in the development of a healthy body posture. Physical health and education inform students on sound eating practices and the essential guidelines for nutrition. Students also have substantial amounts of stress due to curriculum, homework, families and peer pressures. Involvement in sports, recreational activities or other forms of physical fitness offers a method of stress relief. Apart from giving regular training in sports like volleyball, throw ball, kabaddi, cricket and football, we at Kikani have enrolled all our students with KHELO INDIA A NATIONAL FITNESS ASSESSMENT TRAINING PROGRAMME designed by the Sports Authority of India (SAI) and the Central Board of Secondary Education (CBSE)

YOGA

Yoga helps in dealing with various difficulties faced by the children like conflicts, distractions, problems, and dissipation. Yoga education for students results in the growth of the child's psychology and for that reason; we at Kikani have our curriculums with yoga. We believe Yoga at an early age encourages self-esteem and body awareness with a physical activity that's noncompetitive.

PRIVATE COUNSELOR

Guidance and counselling are important for children, and schools have a huge role in bringing out the best in each child. Good conduct is coveted, but sometimes young minds need guidance to polish their personality. Through counselling, children are given advice on how to manage and deal with emotional conflict and personal problems. With an exclusive in-house counsellor Kikani aims at producing leaders with sound and sane minds.

CO - SCHOLASTIC OFFERINGS

CHAPTERS

Nowadays, it's pretty common for children to let off steam by watching TV or playing online games. And while getting lost in technology for a while isn't bad, it's important that your child isn't stuck on the sofa 24/7. Spending some time outside and joining a club / chapters can make a huge difference to the physical and mental wellbeing of children. We at Kikani have identified 7 such chapters and provide an opportunity to students to enroll themselves in these clubs and improve their personalities

- **READING**

A child's reading skills are important to their success in school as they will allow them to access the breadth of the curriculum and improve their communication and language skills. In addition, reading can be a fun and imaginative time for children, which opens doors to all kinds of new worlds for them. As part of our scholastic activities, the reading chapter aims to inculcate the habit of reading amongst students.

- **NATURE**

The Nature Chapter aims at inculcating an appreciation of nature among students and encouraging them to participate in a variety of conservation initiatives. The opportunities and challenges present in the environmental issues are discussed, taking care of the pots in which children have sowed seeds and participating in important nature-oriented programme are the major activities of the chapter.

- **DEBATE**

Debate is an indispensable characteristic of an individual that makes him put forward his perspective in analyzing a situation of social cause whether be it in favour or against. Taking students into

consideration it enables them to elucidate their standpoint through utilizing rhetorical eloquence. Through this chapter we aim to teach students the skills of researching, organizing, and presenting information in a compelling fashion.

- **PUBLIC SPEAKING**

The words 'public speaking' or 'presentation' are words that could make the best of us cringe. It involves capturing the audience's attention and articulating ourselves seamlessly, which is no mean feat. In today's society, communication couldn't be more important. Without solid communication, the ability to engage, progress, converse and influence is diminished. Public speaking can seem like a daunting task, especially for a young boy, however the process can be very beneficial to his personal development. At the public speaking chapter we aim to improve the confidence and language, share knowledge and motivate the students to experiment by presenting themselves out in the public.

- **QUIZ**

Quizzing is the art of the intellect. General knowledge contributes to personal enrichment and a better understanding of the world as a whole. The quiz club aims at identifying students talented in quiz and creating opportunities for them to sharpen their quizzing skills. In addition, the chapter is formed mainly to update the knowledge of the students in various fields like academic, general knowledge, analytical abilities, quantitative reasoning etc.

- **INTERACT**

Interact is a Rotary-sponsored service club for young people. It gives students, an opportunity to participate in fun and meaningful service projects. Through Interact service activities, students learn the importance of leadership

skills and personal integrity, demonstrating helpfulness and respect for other while understanding the value of individual responsibility and hard work

- **DANCE**

Dance is basic to human nature and is a basic form of individual and cultural expression.

Education in the art of dance provides students with deep, thought-provoking experiences that combine many art forms and disciplines. Learning the art of dance is a full, enriching, and physically joyful experience.

- **BAND**

Every child is an artist. There is no substitute or replacement for music making as it relates to the positive growth and development of the human mind, body, and spirit. In fact it is inconceivable to musicians that music education is not considered a core subject in every school curriculum, and

for EVERY child. Unfortunately this is NOT the case at Kikani, if we want the students-of-today to become the music-makers of tomorrow; the responsibility of "sharing the good news about the importance of arts education in our schools" must be embraced with a serious commitment accompanied by a diligent follow-through. We no longer teach only the "interested students;" but we plant the seeds-of-interest and personally escort the students to the gateway of their musical future. Participation in band makes the students enter into the infinite journey of creative expression connecting to a language (music) that is understood, communicated, and appreciated by all of mankind around the globe.

- **HERITAGE**

Through this chapter, we aim at spreading cultural and heritage awareness among students by inspiring and involving them in activities designed to stimulate interest and compassion and to expose them to different concerns linked to our endangered cultural heritage, as well as their responsibility in promoting this cause. Events like Workshops, history tours, lectures, displays, audio-video sessions, etc. are conducted to raise awareness and promote tradition, culture, and heritage.

- **EDUCATIONAL TOURS**

Travel fuels curiosity, offers fresh perspectives, and gives students the opportunity to discover life beyond their backyards. Our educational tours keep students interested and actively learning with specially-designed, hands-on activities in the destinations.

- **PTM**

Everyone is highly busy with their own tasks, profession and business. Teachers are busy completing several tasks other than classroom teaching for maintaining piousness of an educational institution. Students are busy with reading, writing, completing class work and homework. Parents are busy with their profession. However, parents are directly responsible for their child's progress at home and in the school. And we at Kikani believe that it is necessary to develop a strong bridge between parent and educator. Parent teacher meeting is an opportunity to exchange observation of a child with each other. Sharing daily experience and observation provide a wider prospect for parent and teacher to plan, prepare and execute planning for better learning outcome of a child.

KIKANI EXCLUSIVES

KARADIPATH

Power English programme to accelerate the English skills of a child, especially in the areas of listening, speaking, reading, comprehension and expression. It enhances creativity and critical thinking.

MINDBOX

ICT 360 curriculum with Design and Computational Thinking approach to projects as well as interdisciplinary learning with today's relevant technologies and future skills requirements.

HANDWRITING

A programme that focuses especially on the improvement of the handwriting of a child.

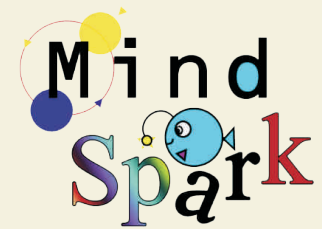

DETAILED ASSESSMENT

A futuristic assessment tool that formulates customized assessment programmes according to the school curriculum and presents immediate detailed feedback on the student's performance.

MINDSPARK

A practice tool for each student's learning pace in sync with the school curriculum and provides instant feedback that clears incorrect understanding.

MUSIC CLASSES

Whilst being fun and social, extracurricular activities are also important in helping develop a child's talents, interests, and passions. One particularly enriching activity is learning to play a musical instrument or sing. There has long been a correlation between

musical training and academic success, but there are other benefits too. Music helps the brain to develop, it is fun, helps children understand maths, relieves stress and teaches children to focus and so on. We offer Music classes as a regular period where we offer options like Vocal, Violin, Keyboard, Drums, Tabla, Mridangam and Guitar.

UNIQUE CONCEPTS

Vidhathu Payir- Learn to Nurture

Conceptualized with the idea of cultivating the habit of farming among students, the Kikanians will nurture their pots throughout the year and would take home their produce. Looking from a broader angle, this procedure would teach each individual lot of values and important life lessons making them better human beings.

Vidyabhyasa – An educational conclave

An annual educational conclave designed exclusively for secondary and senior secondary students' witnesses a galaxy of speakers from across the country that will address and deliberate student centric issues thereby enlightening and transforming the students to approach them from a new perspective.

Anwasha – An Investigatory Research Project

This initiative of instigating the minds to arrive at a scientific method to study and test an idea about how something works, Anwasha is an annual event where students of classes IV- XII participate and compete. It involves researching a topic, formulating a working theory (or hypothesis) that can be tested, conducting the experiment, and recording and reporting the results. After undergoing various levels of scrutiny, the best projects are shortlisted and the winners are announced.

Kik Fest - Intra School Competitions

Art is an expression of the inner self and we aim at providing an opportunity for students to express themselves through art. A series of competitions are scheduled Grade-wise. KIK FEST is conducted during the auspicious time of Navratri.

Kikani Times

The in-house monthly magazine, created purely for students, where articles pertaining to education are published. Pre-primary, primary, Secondary and Higher secondary students are targeted separately with each issue carrying an academic supplement to enhance their knowledge and make them more competent.

SIGNATURE EVENTS to promote healthy participation and competition.

- o Investiture Ceremony
- o Exclusive assemblies
- o Vihriti - Annual Sports Meet
- o Ensemble - Annual Day
- o Absolvire - Kindergarten Graduation Ceremony
- o Open House - Display of the tinytots' works.

WELLNESS and INFIRMARY

Full-time wellness teacher to attend to emergencies and the general well-being of a child (both physical and mental). Well-equipped Infirmary for medical emergencies
